BREITLING

WE TEST THE NAVITIMER 01 46 MM

Christophe Claret

THE ALLEGRO is Christophe Claret's newest minute repeater, and follows the Adagio, from 2010, and the Soprano, from 2013. The watch also has a GMT indicator, big date, and day-night indicator. The time chimes on cathedral gongs, which circle the movement twice. The transparent, sapphire dial provides a view of the big-date mechanism and, on the lower portion of the dial, a part of the repeater mechanism called the rake. The hammers are visible through the caseback. The repeater, operated in the traditional way via a slide at 10 o'clock, incorporates a patented

Christophe Claret invention that minimizes excessive vibrations.

The watch has a single barrel, which provides a power reserve of 60 hours. The balance, balance spring and anchor were all produced in house.

The second time zone, along with the day-night indicator, are at 3 o'clock and a small seconds subdial is at 9. The watch shown here has a case made of rose gold and PVD-treated titanium (a white-gold case is also available; both versions are limited editions of 20 pieces each). The hour and minutes hands are made of orange sapphire and PVD-treated titanium.

The Allegro, \$250,000

Clerc

THE HYDROSCAPH GMT Power-Reserve Chronometer is a new addition to Clerc's Hydroscaph collection of dive watches. The second time zone is shown in a subdial at 6 o'clock and the power reserve on an arched indicator at 12.

The watch contains Caliber C610, an automatic that has been certified by COSC. But the watch's most notable feature is its case: it has 83 components, is 48 mm wide and is water resistant to 800 meters. The bezel is turned by means of a crown at 10 o'clock. There is a helium-release valve at 8 o'clock.

The Hydroscaph GMT Power-Reserve Chronometer comes in three case versions: stainless steel, black DLC-coated stainless steel, and rose gold with black DLC-coated steel. The dial is available in white, black, brown or mid-night blue. The strap is rubber and has a folding clasp.

Hydroscaph GMT Power-Reserve Chronometer, \$7,600
