

CHRISTOPHE CLARET

Christophe Claret makes a new donation to Only Watch

Christophe Claret is once again supporting the **Only Watch** charity auction by presenting a one-of-a-kind model entitled **Espoir & Paix**. With this timepiece, Christophe Claret pays tribute to Hope (*espoir*) on the dial and to Peace (*paix*) on the caseback.

An emerald set in the dial center is highlighted by a mirascope, a device featured for the first time in the Aventicum watch, based on the same principle as a hologram and creating an almost twice-enlarged image of the emerald with its green color symbolizing hope. This optical effect gives the impression that the precious stone is literally bursting out of the watch.

The center of the oscillating weight appearing through the back of the watch is graced with a portrait of Alfred Nobel with a green agate rim revealing the movement. It also bears the name of the 129 laureates who have received the Nobel Peace Prize since its creation, listed clockwise in chronological order with the most recent appearing at 6 o'clock.

A traveling exhibition of the Only Watch collection will be organized starting September 23rd (www.onlywatch.com).

Dates and venues are as follows:

Monaco: *Monaco Yacht Show*, September 23rd to 26th

Hong Kong: *Philips*, October 2nd to 5th

Beijing: *Park View Green*, October 9th to 12th

New York: *Philips*, October 17th to 20th

London: *Philips*, October 24th to 27th

Geneva: *Philips*, November 5th to 7th

A loyal supporter of the Monaco Association against Muscular Dystrophy (AMM) for almost 15 years to date, Christophe Claret is proud to be taking part in this 6th edition of Only Watch, for which the auction will be held in Geneva this year on November 7th.

TECHNICAL CHARACTERISTICS:

Movement:

Caliber:	AVE15, self-winding
Dimensions:	- Diameter: 26.20 mm - Thickness: 3.37 mm (without hands)
Number of parts:	186
Number of jewels:	28
Barrels:	Twin barrels
Power reserve:	72 hours
Escapement:	- Frequency: 4 Hz (28,800 vph) - Swiss lever

Functions:

Hours and minutes display

Case:

Dimensions: Ø 44 x 18.49 mm
Water resistance: 3 ATM / 30 m / 100 ft

Material:

Case:

White gold and anthracite gray grade 5 PVD titanium
Hands in anticorrosive aluminium

Crown:

White gold and anthracite gray grade 5 PVD titanium with cabochon in black PVD titanium

Strap:

Black alligator leather with black stitching

Distinctive features:

Front:

Mirascope in the dial center set with an emerald symbolizing hope.

Engraved motif lacquered in green and white surrounding the emerald.

Back:

Portrait of Alfred Nobel engraved on black anodized aluminum.

Green agate rim revealing the movement.

Engraved names of the 129 laureates who have received the Nobel Peace Prize since its creation, listed clockwise in chronological order with the most recent appearing at 6 o'clock.

The two rows of names furthest from the center remain in a fixed position, while the rows closest to the center turn in step with the oscillating weight.

One-of-a-kind creation.
